Education

New York University, Tandon School of Engineering – M.S. in Computer Science Sep 2026 – Expected May 2028
University of Modena and Reggio Emilia – B.S. in Computer Science, 104/110 (US GPA 3.78/4.00) Graduated Oct 2024

Professional Experience

Bonobo Srl | Software Consulting Startup | Intern to Senior Developer Modena, Italy | Nov 2022 – May 2026
Built management software for 7 client projects in insurance, packaging, social care, sports, and education.

StartClaims | Insurance Claims Platform for Peritek Srl | start-claims.peritek.eu Dec 2022 – May 2026
Primary developer from 2025 | Angular + Laravel + MySQL | 500+ adjusters, ~23K claims/year

- Automated claim intake from 7 insurers (Generali, Unipol, Allianz, Reale, Groupama, ITAS, Zurich) through official APIs and reverse-engineered portals, with deduplication, auto-acceptance, and document download every 30 minutes.
- Cut the main dashboard's load time from 16 s to ~50 ms and its queries from 31 to 9 with batched fetches and covering indexes.
- Replaced paper Word templates with a Digital Desk and an appraisal builder; added a mobile inspection form and a GIS claims map.
- Embedded weekly onsite with the client's owners, turning their workflows into priorities and shipping releases independently.

DOCpack | Cloud Platform for Packaging Design Teams | docpack.it Feb 2025 – May 2026
Primary developer | React + NestJS + TypeScript + PostgreSQL

- Built most of the core platform from scratch in a TypeScript monorepo (customers, contracts, jobs, invoices, time tracking), from database migrations to NestJS APIs and React screens; led development, then supervised a junior developer.
- Built client proposal review on the Adobe PDF Embed API with no-login share links, saved annotations, and approve/reject.

Registro Elettronico | Attendance & Billing Platform for Residential Care Communities Oct 2023 – May 2026
Laravel + Inertia.js + React | 600 residents

- Built the monthly billing engine invoicing public health services: effective-dated fees, costs split across five payers, and annual absence caps; fixed edge cases such as mid-month moves and a date bug that shifted totals.

DuePalleggi | Sports Facility Reservation Platform (Web + Mobile) | www.duepalleggi.it Oct 2023 – Jan 2025
React Native + Laravel | 5.5M+ bookings, 125K+ users, 1,200+ clubs

- Delivered a major web and mobile release (indexed-club bookings that notify the club, calendar invites, secure change-email, per-player split pricing) that became my B.S. capstone thesis under Prof. Nicola Capodiecì.

Iscrizioni Coop Accento | Regional Summer Camp Online Enrollment Portal | iscrizioni.coopaccento.it Feb 2023 – May 2026
Laravel + Tailwind CSS + SOAP | 13,900+ enrollments, 8,600+ children, 223 camps

- Rebuilt registration as a multi-step wizard with three payment providers and integrated a ministry teacher-voucher SOAP service.

Independent Projects

mini-Simone | 3D Portfolio with an AI Chat Companion | Three.js + React + Laravel + Filament Oct 2026
Built with Gemini, Tripo, and Claude Code; the chat forwards questions it can't answer to a Filament dashboard, and my replies teach it.

Yocigaci & MeeTea&Poke | yocigaci.com, meetea-poke.com May 2026 – Jul 2026
Sole Developer of two small-business platforms | Laravel + React + Stripe + Kotlin

- Yocigaci: trading card e-commerce for a shop in Carpi, Italy, with Stripe checkout; 28 orders (€3,600) in its first month.
- MeeTea&Poke: click-and-collect ordering with a Kotlin receipt-printer app; 320 orders (€7,200) in its first three months.

Awage Academy Web Platform | Lead Developer | awage.com Feb 2026 – Present
Deployed the first production prototype on AWS EC2 and designed goal-tracking and mentor features with non-technical founders.

Technical Skills

Languages: C, C++, JavaScript, TypeScript, PHP, Python, Kotlin, SQL | Italian & Mandarin (native), English (fluent)

Frontend: React, React Native, Angular, Inertia.js, Tailwind CSS, MUI, Blade, Adobe PDF Embed API, Google Maps APIs

Backend: Laravel, NestJS (TypeORM), Django, Filament, REST APIs, SOAP, MySQL, PostgreSQL, Stripe, PayPal

Infra & Tools: Docker, AWS EC2/S3, Nginx, GitLab, Google Play Console, Jest, PHPUnit, Claude Code, OpenAI Codex
